

## ACCREDITED CLASSES

We are excited to announce our partnership with K-12 Preparatory Academy, offering accredited classes with flexible learning for our students! Our students can choose between self-paced or live online classes, with daily support from teachers through Microsoft Teams, chat, and email. This partnership is an excellent solution for students transferring from public school, those needing help to meet graduation requirements, and those preparing for college. Courses are available on a per-credit-hour basis or for the full academic year, including a wide range of options such as VR courses, AP courses, Spanish, NCAA-approved programs for student-athletes, career and technical education, and adult high school for ages 19 and up. We're proud to offer this additional resource to our families, ensuring flexibility and convenience for your home education journey.

### PROGRAM

### PRICE
